

ABSTRACT OF THE DISCLOSURE

**Dried emulsion, method for the production thereof, and
its uses**

5 The invention relates to a dried emulsion. In particular,
the invention relates to a dried emulsion containing a
liquid hydrophobic phase and a water- soluble or water-
dispersible polymeric matrix whose hydrophobic phase
10 content is high. The invention also relates to a method
for producing the dried emulsion and to uses of this
emulsion. The utilized water-soluble matrix contains
block copolymers.
